FOR GROWING CONTRACTORS · 5–20 PEOPLE

One system for the office and every engineer.

Scheduling, certificates, quotes, contracts and invoicing in one place. Your team sees what they need. Nobody re-keys anything.

30-day free trial **50% off first 3 months**

THE GROWING PAINS

Past five people, spreadsheets stop scaling.

1

Who is where today?

Phone calls and WhatsApp to find out which engineer is free.

2

Certificates all look different

Every engineer has their own way. Customers and auditors notice.

3

Renewals slip through

Annual contracts and service visits tracked in a diary or someone's memory.

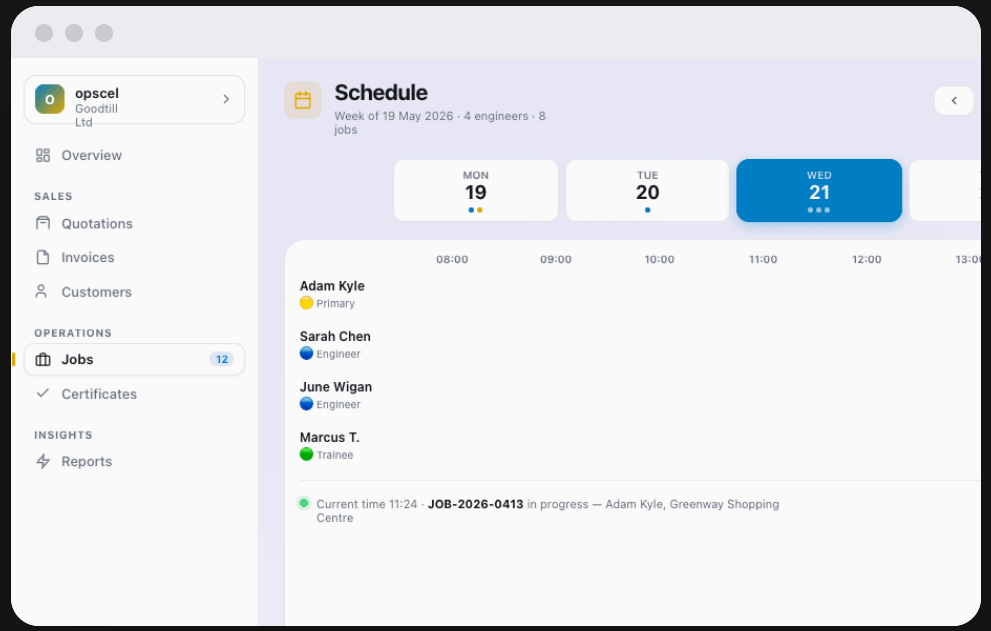

4

The office re-keys everything

Engineers write it down, the office types it up. Twice the work, twice the errors.

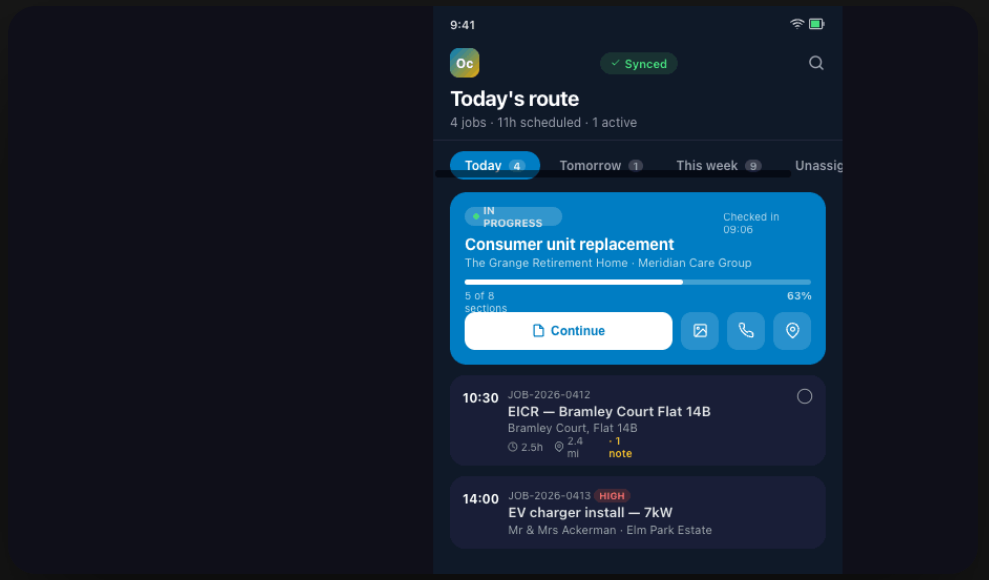

OFFICE AND FIELD, IN SYNC

The office plans it. The engineer does it. Everyone sees it.

Office: drag-and-drop schedule across the whole team

live sync

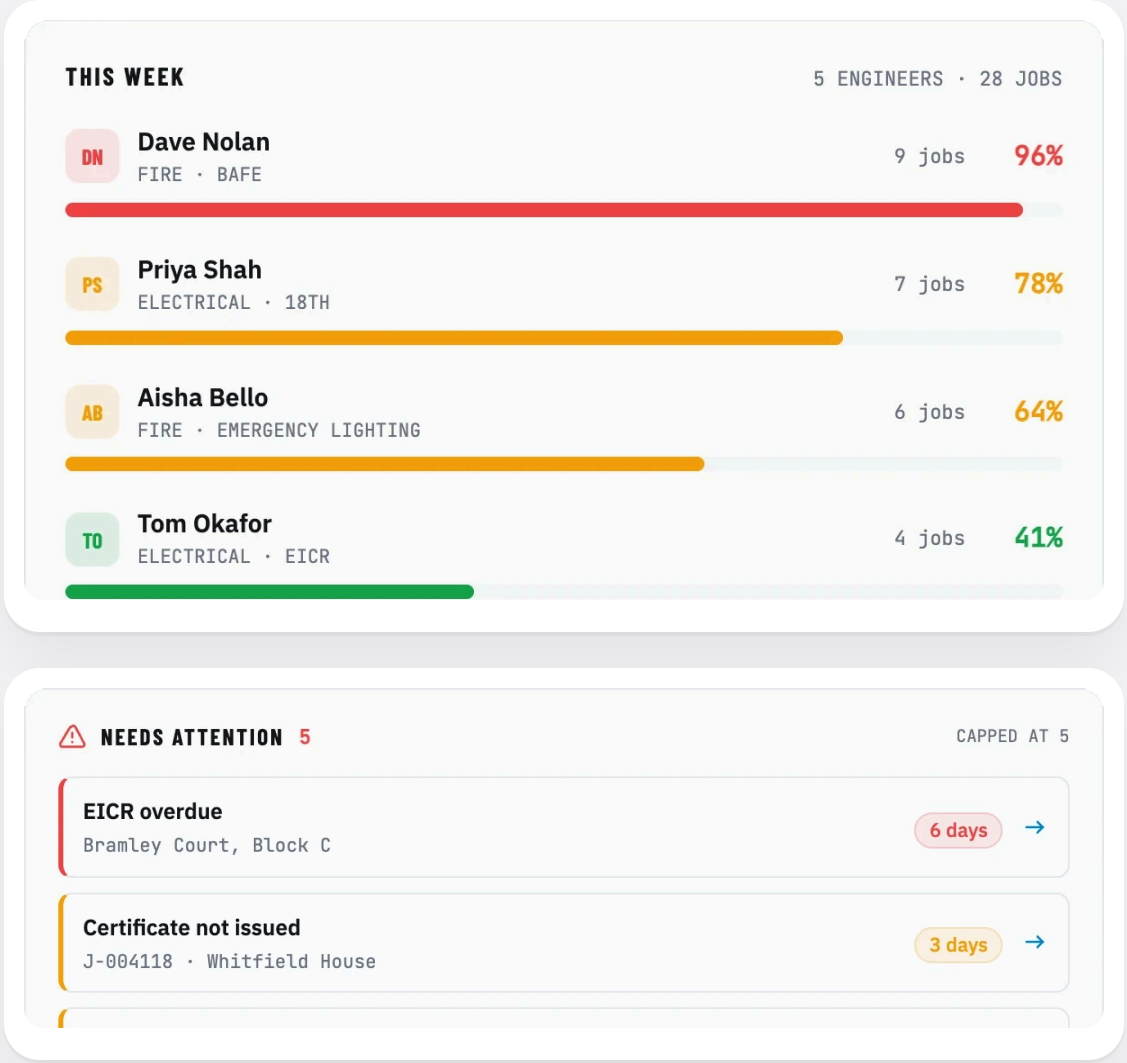

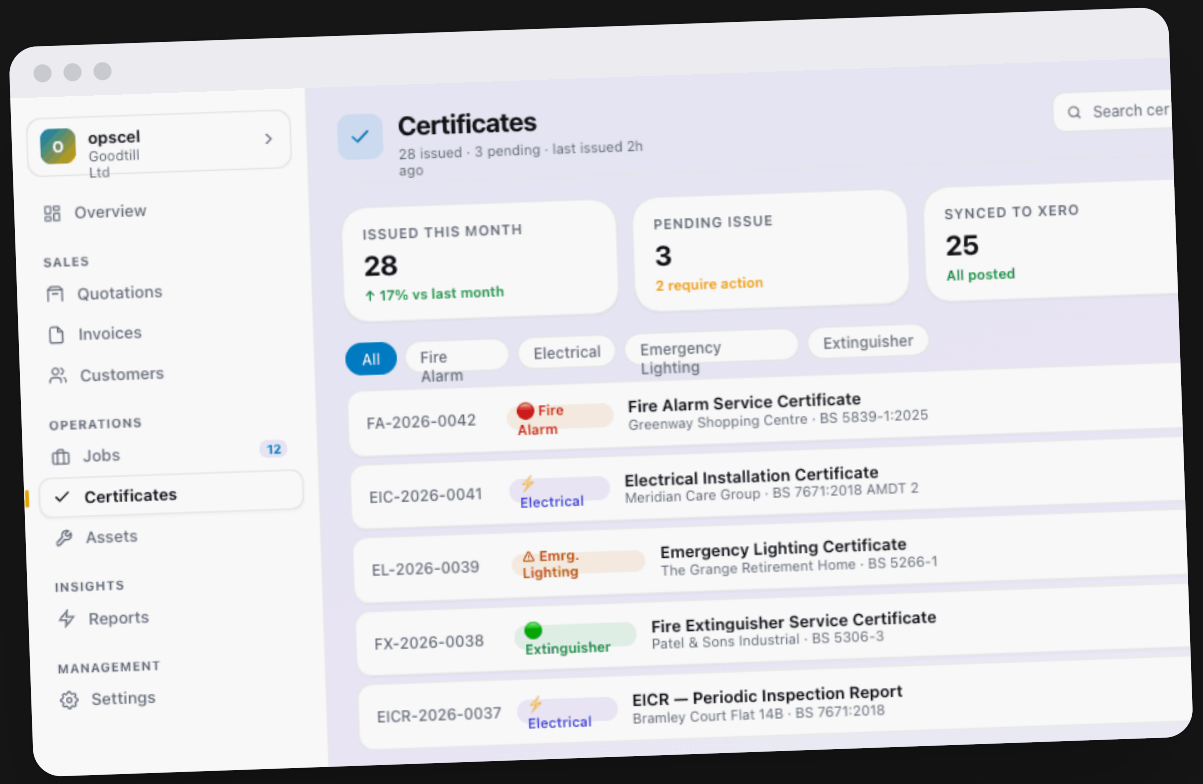

Field: works offline

VISIBILITY

See capacity before it bites.

- **Team utilisation** at a glance, so you know who has capacity
- **Multi-engineer jobs** with the right people assigned
- **Google & Outlook calendar sync**
- **Needs-attention list:** overdue EICRs, unissued certificates, unanswered quotes

COMPLIANCE WITHOUT CHASING

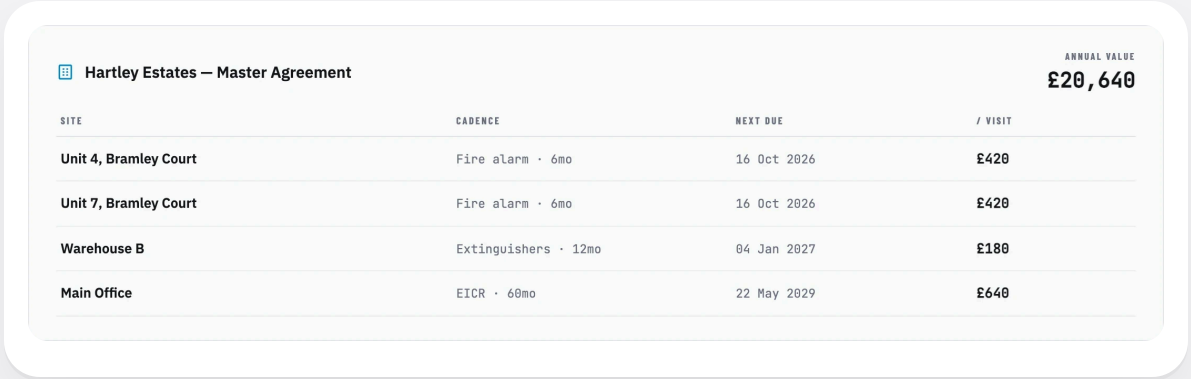

Every certificate consistent and on time.

- **18 certificate types**: BS 7671, BS 5839, BS 5266, BS 5306, EN 62446
- **Your branding** on every one, whoever on the team issued it
- **Job sheets, checklists & customer sign-off** in the field
- **Defects become quotes**, so follow-on work gets captured

RECURRING REVENUE

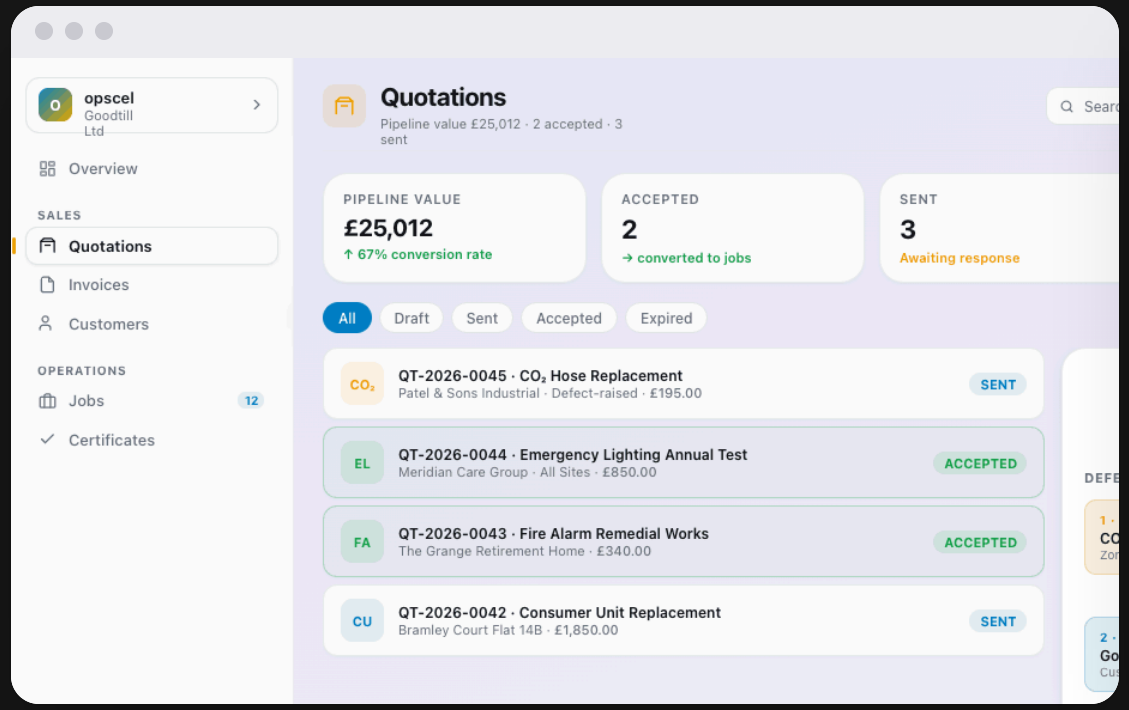

Contracts that renew themselves.

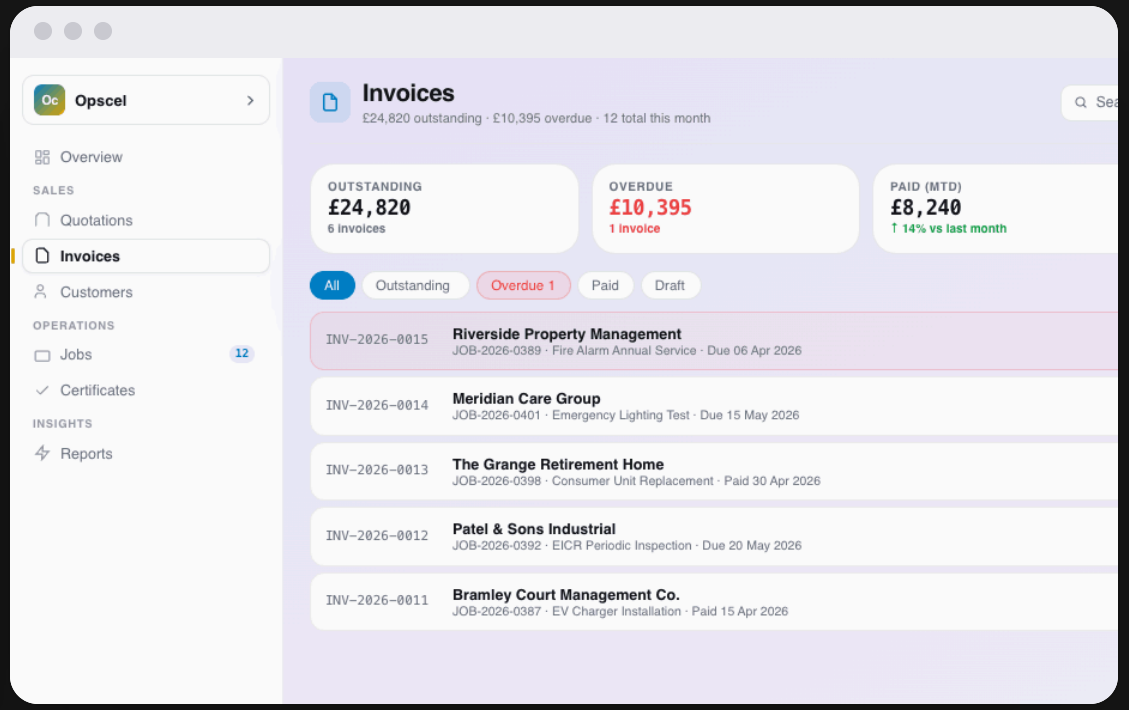

- **Service contracts:** recurring visits, fees and renewal reminders *(Team)*
- **Asset register** with QR/NFC tags: know every device you maintain *(Business)*
- **Portfolio roll-up** of annual value per customer

MONEY

Win it, invoice it, see the profit.

Quotes

Good-Better-Best options, deposits, customer approval by email

Accounting

Xero and QuickBooks sync, no double entry

Reports

Job profitability and pipeline, per engineer

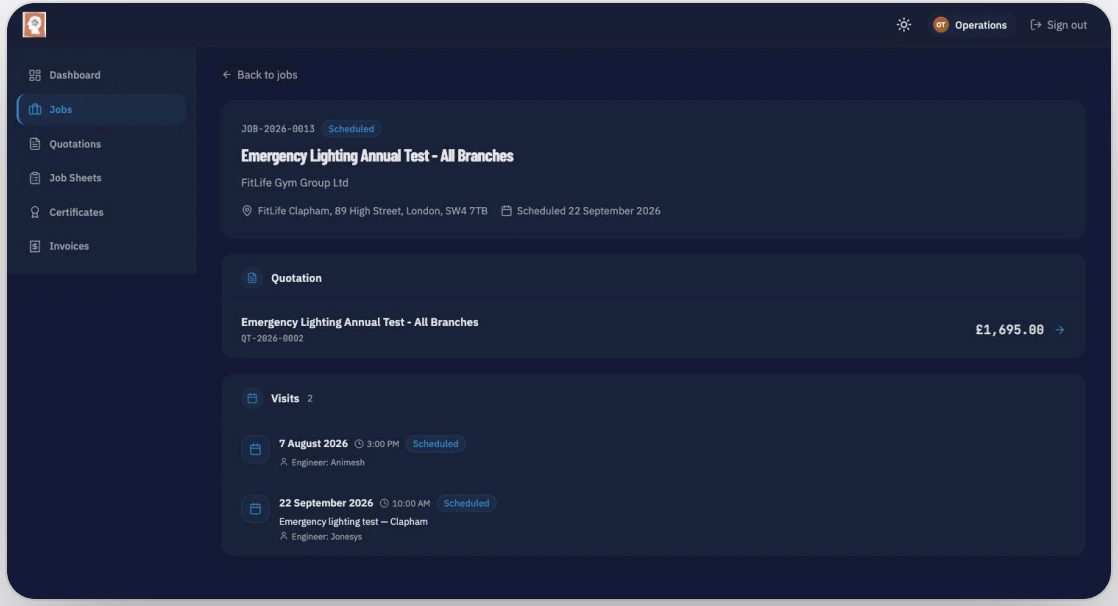

Purchase orders

Order from suppliers against the job

CONTROL & CUSTOMER EXPERIENCE

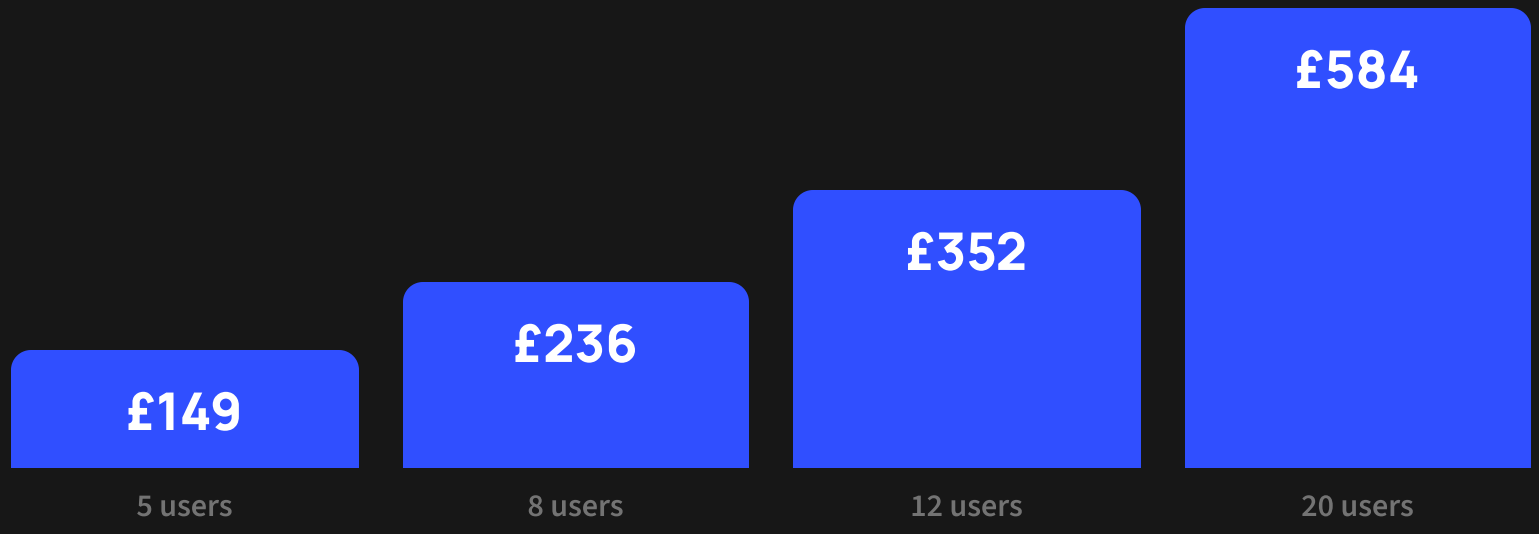

The right access for every role.

- **8 roles:** engineers see only the field app, site managers see no financials, accounts see the money
- **Customer portal:** customers approve quotes, see jobs and certificates *(Business)*
- **RAMS** and **remote monitoring** cases *(Business)*

PRICING THAT SCALES WITH THE TEAM

Business: £149/month includes 5 users. +£29 each after.

What's included

Everything in Starter and Team, plus asset register, customer portal, RAMS and remote monitoring.

10+ engineers? Ask about volume pricing on extra seats.

Smaller on the road, bigger in the office? Team (£99, 3 users) is the same module set minus assets, portal & RAMS.

GETTING STARTED

Live in three steps.

1

Bring your data

Import customers and sites from Xero, QuickBooks or a spreadsheet.

2

Set it up

Add your branding, invite the team, pick roles, connect your calendar.

3

Run your first job

Schedule it, send it to the engineer's phone, issue the certificate and invoice.

Our setup guide takes you from sign-up to your first scheduled job in under 60 minutes.

READY WHEN YOU ARE

See if it fits your team.

30-day free trial with full access. Then 50% off your first 3 months.
